GOVERNMENT OF SASKATCHEWAN TARIFF RESPONSE PLAN

The Government of Saskatchewan Tariff Response Plan

- Is aligned with all other Provinces in the need to take counter action against unjustified tariffs, including stopping the purchase of US alcohol and reviewing all government procurement to prioritize Canadian suppliers, with the goal of reducing or eliminating US procurement;
- Supports efforts to increase procurement from Saskatchewan-based employers, like the recent announcement by Saskatchewan Crowns to increase procurement of steel from Evraz in Regina;
- Supports the federal government in the use of targeted counter tariffs and does not support the use of export tariffs;
- Will continue to work alongside all other Premiers, federal ministers and Canadian business leaders to engage with the US government at all levels to emphasize the harm tariffs will cause to US businesses, workers and consumers;
- Continues to support expanding vital infrastructure projects including ports, pipelines and rail, including their construction and seamless operations, and will work to provide swift approval of any projects that pass through Saskatchewan;
- Continues to reduce Saskatchewan's reliance on exports to the United States by increasing Saskatchewan exports to other countries through international trade missions and trade offices;
- Supports the complete removal of the carbon tax on everything for everyone, including removal of the industrial carbon tax that negatively impacts Saskatchewan businesses and jobs and drives up the cost of Canadian-made products

Premier Scott Moe

March 20 in the Legislature, MLAs debated and unanimously passed our government's tariff response plan.

Premier Scott Moe thanks to all Saskatchewan Party and NDP MLAs for your united support of Saskatchewan's plan.

2025-26 BUDGET: DELIVERING FOR YOU

Saskatchewan's 2025-26 Provincial Budget is delivering for the people of Saskatchewan.

Deputy Premier and Finance Minister Jim Reiter tabled a budget today that delivers on the priorities of Saskatchewan people - affordability, health care, education,

safer communities and responsible financial management - while addressing the challenges of a growing province.

"We understand this budget is being delivered at a very volatile time, due to the constantly changing tariff threats from the United States," Reiter said. "Right now, we do not know what tariffs the U.S. may impose or how long they may last. As a result, it was not possible to build the exact impact of tariffs into the budget."

"However, we are not letting the tariff threat prevent us from following through on our commitments to the people of Saskatchewan. Our strong financial position means we are well-positioned to weather the impact of any tariffs that may be imposed on Canada and Saskatchewan."
